PRODUCT OF THE MONTH

BY MICHAELA DRUMM

Awning Roof Rafters (Curved)

With the arrival of the summer storms, we thought our special this month should be something that will make the season a little easier on you.

The rain collects on your awning fabric, causing it to stretch, or worse, damage your hardware or rip the fabric, and the wind makes your fabric flap!

The most popular solution to all of this is to use a Roof Rafter with your awning.

These nifty extendable rafters fit into a bracket on your van, while the other end has a spigot that fits into a hole in your awning tube. A locking knob allows you to get the perfect length every time. The rafter then sits underneath your awning fabric and provides it with extra support.

The number of rafters you need is dependent on the length of your awnings:

11' & under	1
12'	1 (2)
13'	2
14'	2
15'	2
16'	2
17'	2 (3)
18'	3
19'	3
20'	3
21'	3 (4)
22 & over	4

Save yourself the worry and protect your van and awning.
